Subject: RE: NCITS/W1.1 - TC Empowerment over Structure

May 15, 2000
Barbara,

The scope of the project is to create a reference standard that would include: a precisely defined measurement procedure for appearance - based image quality metrics; test images from which the defined measurements can be obtained; and validation of the process.

The Task Group will meet (in-person) in Vancouver, Canada on October 16, 2000 at the Imaging Science and Technology (IS&T) meeting. It will exchange information via email to prepare for the October 16 meeting. For further information, please call Norm Burningham, Chair, NCITS/W1.1 at (nwb@boi.hp.com) or Jean Baronas, Chair, NCITS/W1 at (Jean.M.Baronas@usa.xerox.com).

A press release is in the works (you should receive it by the end of the week) explaining: how interested parties may give input and become participating members in the project.

If you need anymore information, please ask.

Jean
