Washington, DC 20005-3922

Dear Deborah,

The T11 committee has prepared a project proposal for a technical report to be entitled Fibre Channel Avionics Environment - 2 (FC-AE-2). The project is intended to recommend the development of new, and correction of existing, compliance criteria that allows interoperable sets of hardware and software to be specified and implemented to create an embedded Fibre Channel network within avionics applications.

The motion to accept the project proposal contained in Fibre Channel Avionics Environment - 2 (FC-AE-2), document T11/02-625v2 and forward it to INCITS for further processing was accepted by a meeting vote in the December 12, 2002 meeting of T11, held in Tucson, AZ. The motion carried with 40 in favor, 0 opposed, 0 Abstaining, and with 20 Not Voting. The membership stood at 60 in this meeting. The vote met the two-thirds rule. The vote is recorded in clause 10.2.1 of the enclosed minutes, T11/02-762v1.

Could you please take the appropriate steps to carry forward the recommendation of T11 and accept the project as a type DT project to be developed within T11.

Thank you very much for your assistance in this matter.

Sincerely,

Bob Snively, chair TC T11 e-mail: rsnively@brocade.com
